SUBJECT and TITLE INDEX

POLYMER ENGINEERING AND SCIENCE
VOLUME 22
1982

A

1. Absorption

Absorption of NH_3 by Nylon-6, A. E. Zachariades, T. Kanamoto, and R. S. Porter, *Mid-June, p. 519*

Moisture Absorption by Tetraglycidyl 4,4′-diaminodiphenyl Methane/4,4′-diaminodiphenyl Sulfone Epoxies Containing Brominated Epoxy Copolymers, J. Goobich and G. Marom, *November, p. 1052*

2. Accelerated-Stress-Life Model

A Proposed Model for Accelerated-Stress Life-Test Data Exhibiting Two Failure Modes, G. C. Derringer, *April, p. 354*

3. Acetate Reactivity-Copolymers of EVA

Reactivity of Ethylene Vinyl Acetate Copolymers: A Critical Evaluation of the Comprehensive Patent Literature on the Acetoxy-hydroxide Transformation of Ethylene Vinyl Acetate Copolymers, R. J. Koopmans, R. Van Der Linden, and E. F. Vansant, *July, p. 645*

4. Acetoxy-hydroxide Transformation

Reactivity of Ethylene Vinyl Acetate Copolymers: A Critical Evaluation of the Comprehensive Patent Literature on the Acetoxy-hydroxide Transformation of Ethylene Vinly Acetate Copolymers, R. J. Koopmans, R. Van Der Linden, and E. F. Vansant, *July, p. 645*

5. Acrylonitrile

Effect of Shear Rate on Solution Polymerization of Acrylonitrile, A. Kumar and S. K. Gupta, *December, p. 1184*

6. Acrylonitrile-Butadiene-Styrene (ABS)

Methods for Study of Thermal Aging and Stabilization of Grafted Acrylonitrile-Butadiene-Styrene (ABS) Terpolymers, D. M. Chang, *April, p. 376*

Fracture Analysis of Acrylonitrile-Butadiene-Styrene Resins, N. S. Sridharan and L. J. Broutman, *August, p. 760*

7. Adhesion

Mechanistic Studies of Adhesion Promotion by γ-Aminopropyl Triethoxy Silane in α-Al_2O_3/Polyethylene Joint, N. H. Sung, A. Kaul, I. Chin, and C. S. P. Sung, *July, p. 637*

8. Adhesion Promotion

Mechanistic Studies of Adhesion Promotion by γ-Aminopropyl Triethoxy Silane in α-Al_2O_3/Polyethylene Joint, N. H. Sung, A. Kaul, I. Chin, and C. S. P. Sung, *July, p. 637*

9. Adhesives

Addition Polyimide Adhesives Containing Various End Groups, A. K. St. Clair and T. L. St. Clair, *January, p. 9*

Aging of Pressure-Sensitive Adhesives I: Stability of Styrene-Isoprene-Styrene Block Copolymer Films at 95°C, D. J. P. Harrison, J. F. Johnson, and W. R. Yates, *Mid-October, p. 865*

10. Agglomeration Analysis

Rheological Analysis of Highly Loaded Polymeric Composites Filled with Non-Agglomerating Spherical Filler Particles, D. M. Bigg, *Mid-June, p. 512*

11. Aging

Effects of High Oxygen Pressure and Temperature on the Aging of Polypropylene, D. L. Faulkner, *Mid-June, p. 466*

12. α-Al_2O_3/Polyethylene

Mechanistic Studies of Adhesion Promotion by γ-Aminopropyl Triethoxy Silane in α-Al_2O_3/Polyethylene Joint, N. H. Sung, A. Kaul, I. Chin, and C. S. P. Sung, *July, p. 637*

13. Amine-Cured Epoxy-Kinetics

Kinetics of a Sterically Hindered Amine-Cured Epoxy Resin System, L. Buckley and D. Roylance, *February, p. 166*

14. Amorphous PET-Cracking

Fatigue Crack Propagation in Amorphous Poly(ethylene terephthalate), A. Ramirez, J. A. Manson, and R. W. Hertzberg, *October, p. 975*

15. Amphoteric Blends

Siloxane-Poly (Methacrylate) Amphoteric Blends, T. T. Blahovici, G. R. Brown, and L. E. St. Pierre, *Mid-December, p. 1123*

16. Anisotropy

Shear-Induced Anisotropy in Thermal Conductivity of a Polyethylene Melt, J. J. C. Picot, G. I. Goobie, and G. S. Mawhinney, *February, p. 154*

Anisotropy and Dimensions of Blow-Molded Polyethylene Bottles, M. R. Kamal, D. Kalyon, and V. Tan, *Mid-April, p. 287*

Anisotropic Hygroelastic Behavior of Poly(methyl methacrylate) Under Case II Diffusion, D. Cohn and G. Marom, *Mid-October, p. 870*

17. Annular Die

Swell of Extrudate From an Annular Die, A. Garcia-Rejon and J. M. Dealy, *February, p. 158*

18. Aramid/Epoxy-Fatigue Resistance

The Effect of Moisture on the Fatigue Resistance of an Aramid/Epoxy Composite, M. E. Roylance, *October, p. 988*

19. A-Type Bisphenol-Curing

The Curing of a Bisphenol A-Type Epoxy Resin with 1,8 Diamino-p-Menthane, T. Donnellan and D. Roylance, *September, p. 821*

20. Autovibron

Determination of the Glass Transition of Polymer by the Autovibron, T. Murayama, *August, p. 788*

B

21. Behavior-Mechanical

Dynamic Mechanical Behavior of Filled Polyethylenes and Model Composites, V. P. Chacko, F. E. Karasz, and R. J. Farris, *October, p. 968*

22. Bisphenol

The Curing of a Bisphenol A-Type Epoxy Resin with 1,8 Diamino-p-Menthane, T. Donnellan and D. Roylance, *September, p. 821*

23. Biphenol-A Polycarbonate and PBTP-Transesterification

The Transesterification of Bisphenol-A Polycarbonate (PC) and Polybutylene Terephthalate (PBTP): A New Route to Block Copolycondensates, J. Devaux, P. Godard, and J. P. Mercier, *March, p. 229*

25. Blends

The Characterization of Blend Microstructure, A. Garton, *Mid-February, p. 124*

Processing and Commercial Application of Polymer Blends, M. T. Shaw, *Mid-February, p. 115*

Rubber Blends Opportunities For Future Research, R. F. Bauer, *Mid-February, p. 130*

Miscibility Phenomena in Polyester/Chlorinated Polymer Blends, R. E. Prud'Homme, *Mid-February, p. 90*

Melt Rheology of Polymer Blends, L. A. Utracki, *Mid-February, p. 96*

Property-Morphology Relationships of Polymethylmethacrylate/Polyvinylidenefluoride Blends, J. Mijovic, H-L. Luo, and C. D. Han, *March, p. 234*

Processing Properties of High- and Low-Density Polyethylenes and Their Blends, B. Maxwell, E. J. Dormier, F. P. Smith, and P. P. Tong, *Mid-April, p. 280*

Effect of the Addition of Ethylene-Propylene Random Copolymers on the Properties of High-Density Polyethylene/Isotactic Polypropylene Blends: Part 1—Morphology and Impact Behavior of Molded Samples, L. D'Orazio, R. Greco, C. Mancarella, E. Martuscelli, G. Ragosta, and C. Silvestre, *June, p. 536*

Blends of EPDM and Sulfonated Ethylene-Propylene-Diene (EPDM) Rubber with Polypropylene: Structure, Physical, and Rheological Properties, I. Duvdevani, P. K. Agarwal, and R. D. Lundberg, *Mid-June, p. 499*

Rheology of Polymer Blends: Simultaneous Slippage and Entrance Pressure Loss in the Ethylene-Propylene-Diene (EPDM)/-Viton System, R. C. Kanu and M. T. Shaw, *Mid-June, p. 507*

The Mechanical Properties of Styrene-Butadiene-Styrene (SBS) Triblock Copolymer Blends with Polystyrene (PS) and Styrene-Butadiene Copolymer (SBR), J. Diamant, D. Soong, and M. C. Williams, *Mid-August, p. 673*

Mechanical Criteria for Polymer Compatibility; Poly(vinylchloride) Postchlorinated Poly(vinylchloride) Blends, D. D. Clark, E. A. Collins, and L. W. Kleiner, *Mid-August, p. 698*

Studies of Poly(2,6-Dimethyl-1,4-Phenylene Oxide) Blends: 1. Copolymers of Styrene and Maleic Anhydride, J. R. Fried and G. A. Hanna, *Mid-August, p. 705*

13C NMR Characterization of Intermolecular Interactions for Polymers. Part 3. Solvent Events on the Blend Compatibility of Poly(Vinyl Methyl Ether) and Polystyrene, M. B. Djordjevic and R. S. Porter, *Mid-December, p. 1109*

Economics of Polymer Blends, L. A. Utracki, *Mid-December, p. 1166*

Some Aspects of the Miscibility Behavior of Polyester/Halogenated Polymer Blends, R. E. Prud'Homme, *Mid-December, p. 1138*

27. Block Copolymers

Time-Dependent Morphologies and Viscoelastic Properties of Block Copolymers, J. C. Kelterborn and D. S. Soong, *Mid-August, p. 654*

28. Blowmolding

Anisotropy and Dimensions of Blow-Molded Polyethylene Bottles, M. R. Kamal, D. Kalyon, and V. Tan, *Mid-April, p. 287*

The Dynamics of Parison Free Inflation in Extrusion Blow Molding, M. E. Ryan and A. Dutta, *June, p. 569*

Mathematical Modeling of the Blow-Molding Process, M. E. Ryan and A. Dutta, *Mid-December, p. 1075*

29. Bottle Volume Change Under Pressure

The Elastic Change of Volume in Pressurized Bottles Made From Polymeric Materials, R-Y. Wu and Z. H. Stachurski, *Mid-June, p. 472*

31. Bromination

The Effect of Bromination and Inherent Vinyl Unsaturation on the Drawing Behavior of High-Density Polyethylene, T. Tincer and G. Akay, *May, p. 410*

Moisture Absorption by Tetraglycidyl 4,4′-diaminodiphenyl Methane/4,4′-diaminodiphenyl Sulfone Epoxies Containing Brominated Epoxy Copolymers, J. Goobich and G. Marom, *November, p. 1052*

32. Butadiene-Acrylonitrile

Multiphase Polymer Processing: Controlled-Ingredient-Distribution Mixing and Its Effect on Some Properties of Styrene-Butadiene (SBR)/Butadiene-Acrylonitrile Copolymer Rubber Blend Compounds, B-L. Lee, *Mid-October, p. 902*

C

33. (13)C NMR

13C NMR Characterization of Intermolecular Interactions For Polymers. Part 3. Solvent Event on the Blend Compatibility of Poly(Vinyl Methyl Ether) and Polystyrene, M. B. Djordjevic and R. S. Porter, *Mid-December, p. 1109*

34. Capillary Flow

Capillary and Slit Flow Behavior of Concentrated Solutions of a Rod-like Polymer, C. H. Kao and D. G. Baird, *June, p. 521*

Rheology of Reinforced Thermoplastics and its Application to Injection-Molding: IV. Transient Injection Capillary Flow and Injection-Molding, G. Akay, *November, p. 1027*

35. Carbon

The Relationship of Carbon Black Dispersion to Electrical Resistivity and Vulcanizate Physical Properties, R. J. Cembrola, *July, p. 601*

Carbon Fiber-Reinforced Composites: Effect of Fiber Surface on Polymer Properties, Y. S. Ko, W. C. Forsman, and T. S. Dziemianowicz, *September, p. 805*

36. Cavitation Erosion

Studies on Polyurethane Protective Surface Material Resistance to Cavitation Erosion, X. H. Xiong, G. X. Min, Z. Q. Tao, X. S. Li, and C. R. Zhi, *August, p. 752*

37. Chemical Reaction and Diffusion in Velocity Gradient Fields

Stress-Induced Diffusion and Chemical Reaction in Nonhomogeneous Velocity Gradient Fields, G. Akay, *September, p. 798*

38. Chlorinated Polymer Blends

Miscibility Phenomena in Polyester/Chlorinated Polymer Blends, R. E, Prud'Homme, *Mid-February, p. 90*

39. Chromatography

A Note on the Prediction of Polyethylene Melt Rheological Properties from Molecular Weight Distribution Data Obtained by Gel Permeation Chromatography, B. H. Shah and R. Darby, *January, p. 53*

40. Commercializing Blends

Processing and Commercial Application of Polymer Blends, M. T. Shaw, *Mid-February, p. 115*

41. Compaction of Polymeric Powders

Effect of Compaction Rate During the Cold Forming of Polymeric Powders, R. J. Crawford, *Mid-April, p. 300*

42. Compact Tension Specimen

Fracture Toughness (K_Q) Testing with a Mini-Compact Tension (CT) Specimen, C. Y. Lee and W. B. Jones, Jr., *December, p. 1190*

43. Computer Simulation

Computer Simulation of Injection Molding, M. R. Kamal and P. G. Lafleur, *Mid-December, p. 1066*

45. Composites

Carbon Fiber-Reinforced Composites: Effect of Fiber Surface on Polymer Properties, Y. S. Ko, W. C. Forsman, and T. S. Dziemianowicz, *September, p. 805*

46. Computational Scheme for Calculating Molecular-Weight Distribution

Computational Scheme for the Calculation of Molecular Weight Distributions for Nylon 6 Polymerization in Homogeneous, Continuous-Flow Stirred-Tank Reactors with Continuous Removal of Water, A. Ramagopal, A. Kumar, and S. K. Gupta, *September, p. 849*

47. Conductivity

Shear-Induced Anisotropy in Thermal Conductivity of a Polyethylene Melt, J. J. C. Picot, G. I. Goobie, and G. S. Mawhinney, *February, p. 154*

Electrical Conductivity Changes Associated with Thermal Decomposition of Phenolic- and Silicone-Based Materials, R. T. Johnson, Jr. and R. M. Biefeld, *February, p. 147*

48. Conversion

Conversion Prediction in High Conversion Free-Radical Polymerizations, S. Balke, L. Garcia, and R. Patel, *August, p. 777*

49. Copolycondensates

The Transesterification of Bisphenol-A Polycarbonate (PC) and Polybutylene Terephthalate (PBTP): A New Route to Block Copolycondensates, J. Devaux, P. Godard, and J. P. Mercier, *March, p. 229*

49.5 Copolymers

Graft Copolymerization of Vinyl Chloride onto Ethylene Propylene Rubber (EPR) and Ethylene Propylenediene Monomer (EPDM) by Bulk Process, A. Takahashi, *January, p. 48*

Low Temperature Thermal Aging of Ethylene Vinyl Alcohol Copolymers, A. Apicella, H. B. Hopfenberg, and S. Piccarolo, *April, p. 382*

Effect of the Addition of Ethylene-Propylene Random Copolymers on the Properties of High-Density Polyethylene/Isotactic Polypropylene Blends: Part 1—Morphology and Impact Behavior of Molded Samples, L. D'Orazio, R. Greco, C. Mancarella, E. Martuscelli, G. Ragosta, and C. Silvestre, *June, p. 536*

Reactivity of Ethylene Vinyl Acetate Copolymers: A Critical Evaluation of the Comprehensive Patent Literature on the Acetoxy-hydroxide Transformation of Ethylene Vinyl Acetate Copolymers, R. J. Koopmans, R. Van Der Linden, and E. F. Vansant, *July, p. 645*

Aging of Pressure-Sensitive Adhesives I: Stability of Styrene-Isoprene-Styrene Block Copolymer Films at 95°C, D. J. P. Harrison, J. F. Johnson, and W. R. Yates, *Mid-October, p. 865*

Quantitative Determination of the Vinylacetate Content in Ethylene Vinyl-Acetate Copolymers—A Critical Review, R. J. Koopmans, R. Van Der Linden, and E. F. Vansant, *Mid-October, p. 878*

Multiphase Polymer Processing: Controlled-Ingredient-Distribution Mixing and Its Effect on Some Properties of Styrene-Butadiene (SBR)/Butadiene-Acrylonitrile Copolymer Rubber Blend Compounds, B-L. Lee, *Mid-October, p. 902*

Photo-Oxidation and Photo-Stabilization of Blends of Low-Density Polyethylene and Styrene-Butadiene-Styrene Copolymers, C. David, F. Zabeau, and R. A. Jacobs, *Mid-October, p. 912*

Moisture Absorption by Tetraglycidyl 4,4′-diaminodiphenyl Methane/4,4′-diaminodiphenyl Sulfone Epoxies Containing Brominated Epoxy Copolymers, J. Goobich and G. Marom, *November, p. 1052*

50. Craze Formation

A Criterion for Craze Formation, T. Juska and I. R. Harrison, *August, p. 766*

51. Crosslinking

Crosslinking of Fluorocarbon Elastomers: Characterization of Crosslinking System to Obtain Transparent, Tough Materials, G. A. Miller and L. H. Sperling, *Mid-June, p. 478*

Studies of Epoxy Resin Systems: Part D: Fracture Toughness of an Epoxy Resin: A Study of the Effect of Crosslinking and Sub-T Aging, T. D. Chang and J. O. Brittain, *December, p. 1228*

Studies of Epoxy Resin Systems: Part B: Effect of Crosslinking on the Physical Properties of an Epoxy Resin, T. D. Chang, S. H. Carr, and J. O. Brittain, *December, p. 1213*

52. Crystallization

Mechanisms of Flow Induced Crystallization, A. J. McHugh, *January, p. 15*

Optical Properties of Thermally Crystallized Poly(ethylene terephthalate), S. A. Jabarin, *September, p. 815*

53. Cure

Thermoset Injection Molding Dynamics and the Distribution of Cure in Thermoset Molded Parts, S. Sidi and M. R. Kamal, *April, p. 349*

Curing Characteristics of Particulate-Filled Thermosets, S. H. McGee, *Mid-June, p. 484*

D

54. Decomposition of Phenolic- and Silicone-Based Materials

Electrical Conductivity Changes Associated with Thermal Decomposition of Phenolic- and Silicone-Based Materials, R. T. Johnson, Jr. and R. M. Biefeld, *February, p. 147*

55. Deformation

Large Deformation Behavior of Some Thermoplastics, R. K. Mittal and I. P. Singh, *April, p. 358*

The Compressive Deformation of Polymeric Foams, J. T. Tsai, *June, p. 545*

Variation of Dynamic Mechanical Properties of Polycarbonate as a Result of Deformation, H. J. Kolman, K. Ard, and C. L. Beatty, *October, p. 950*

Use of Dielectric Relaxation Spectroscopy to Monitor Deformation of Polycarbonate, K. Venkataswamy, K. Ard, and C. L. Beatty, *October, p. 955*

Dynamic Mechanical Spectroscopy of Sheet Molding Compound as a Function of Deformation, K. Ard, H. J. Kolman, and C. L. Beatty, *October, p. 994*

56. Degradation

Degradation of Polyurethane Containing Phosphorus, N. Grassie, *November, p. 1057*

57. Devolatilization

Devolatilization of Polymer Melts in Single-Screw Extruders, J. A. Biesenberger and G. Kessidis, *September, p. 832*

59. 1,8 Diamino-p-Methane Curing

The Curing of a Bisphenol A-Type Epoxy Resin with 1,8 Diamino-p-Methane, T. Donnellan and D. Roylance, *September, p. 821*

60. Dies

A Network Flow Analysis of Extrusion Dies and Other Flow Systems, M. L. Booy, *May, p. 432*

Swell of Extrudate From an Annular Die, A. Garcia-Rejon and J. M. Dealy, *February, p. 158*

Prediction of Extrusion Pressure Loss of Polymer Melts Flowing Through Noncircular Dies, C. Tiu, *November, p. 1049*

61. Die-Drawing

The Hydrostatic Extrusion and Die-Drawing of Glass-Fiber-Reinforced Polyoxymethylene, P. S. Hope, A. Richardson and I. M. Ward, *Mid-April, p. 307*

62. Dielectric Properties of PVC

Influence of the Thermal History on Dielectric Properties of Poly(Vinyl Chloride) R. D. Calleja and J. L. G. Ribelles, *September, p. 845*

66. Diffusion

Stress-Induced Diffusion and Chemical Reaction in Nonhomogeneous Velocity Gradient Fields, G. Akay, *September, p. 798*

On the Fickian Diffusion of Organic Penetrants in Glassy Polymers, I. Tosun and L. Yilmaz, *November, p. 1043*

Diffusion and Localized Swelling Resistances in Glassy Polymers, C. Gostoli and G. C. Sarti, *November, p. 1018*

E

67. Elastic Change

The Elastic Change of Volume in Pressurized Bottles Made From Polymeric Materials, R-Y. Wu and Z. H. Stachurski, *Mid-June, p. 472*

68. Elastomers

Crosslinking of Fluorocarbon Elastomers: Characterization of Crosslinking System to Obtain Transparent, Tough Materials, G. A. Miller and L. H. Sperling, *Mid-June, p. 478*

69. Electrical

Electrical Conductivity Changes Associated with Thermal Decomposition of Phenolic- and Silicone-Based Materials, R. T. Johnson, Jr. and R. M. Biefeld, *February, p. 147*

The Relationship of Carbon Black Dispersion to Electrical Resistivity and Vulcanizate Physical Properties, R. J. Cembrola, *July, p. 601*

An Electrical Method of Measuring Crack Length during Crack Propagation Tests of Polymers, A. M. Serrano, G. E. Welsch, and R. Gibala, *October, p. 934*

70. Embrittlement-Surface

The Effect of Surface Embrittlement on the Mechanical Behavior of Rubber-Modified Polymers, P. So and L. J. Broutman, *Mid-October, p. 888*

71. Energy

Energy Conservation in Plastics Processing: A Review, J. M. Dealy, *June, p. 528*

72. Environmental

Environmental Effects of Silicone Oil on Tensile and Fatigue Properties of Polystyrene C. C. Chen, D. R. Morrow, and J. A. Sauer, *May, p. 451*

73. Epoxy

Moisture Absorption by Tetraglycidyl 4,4′-diaminodiphenyl Methane/4,4′-diaminodiphenyl Sulfone Epoxies Containing Brominated Epoxy Copolymers, J. Goobich and G. Marom, *November, p. 1052*

74. Epoxy Resin Systems

Studies of Epoxy Resin Systems: Part A: A Study of the Origins of the Secondary Relaxations of Epoxy Resins by Thermally Stimulated Depolarization, T. D. Chang, S. H. Carr, and J. O. Brittain, *December, p. 1205*

Studies of Epoxy Resin Systems: Part B: Effect of Crosslinking on the Physical Properties of an Epoxy Resin. T. D. Chang, S. H. Carr, and J. O. Brittain, *December, p. 1213*

Studies of Epoxy Resin Systems: Part C: Effect of Sub-T_g Aging on the Physical Properties of a Fully Cured Epoxy Resin, T. D. Chang and J. O. Brittain, *December, p. 1221*

Kinetics of a Sterically Hindered Amine-Cured Epoxy Resin System, L. Buckley and D. Roylance, *February, p. 166*

The Curing of a Bisphenol A-Type Epoxy Resin with 1,8 Diamino-p-Menthane, T. Donnellan and D. Roylance, *September, p. 821*

75. Esterification

Modeling of Poly(Ethylene Terephthalate) Reactors: 4. A Continuous Esterification Process: K. Ravindranath and R. A. Mashelkar, *July, p. 610*

76. Ethylene Copolymers

Effect of the Addition of Ethylene-Propylene Random Copolymers on the Properties of High-Density Polyethylene-Isotactic Polypropylene Blends: Part 1—Morphology and Impact Behavior of Molded Samples, L. D'Orazio, R. Greco, C. Mancarella, E. Martuscelli, G. Ragosta, and C. Silvestri, *June, p. 536*

Low Temperature Thermal Aging of Ethylene Vinyl Alcohol Copolymers, A. Apicella, H. B. Hopfenberg, and S. Piccarolo, *April, p. 382*

Modeling of Poly(Ethylene Terephthalate) Reactors: 4. A Continuous Esterification Process K. Ravindranath and R. A. Mashelkar, *July, p. 610*

Modeling of Poly(Ethylene Terephthalate) Reactors: 6. A Continuous Process for Final Stages of Polycondensation, K. Ravindranath and R. A. Mashelkar, *July, p. 628*

Reactivity of Ethylene Vinyl Acetate Copolymers: A Critical Evaluation of the Comprehensive Patent Literature on the Acetoxy-hydroxide Transformation of Ethylene Vinyl Acetate Copolymers, R. J. Koopmans, R. Van Der Linden, and E. F. Vansant, *July, p. 645*

Quantitative Determination of the Vinylacetate Content in Ethylene Vinyl-Acetate Copolymers—A Critical Review, R. J. Koopmans, R. Van Der Linden, and E. F. Vansant, *Mid-October, p. 878*

77. Ethylene-Propylene-Diene (EPDM)

Graft Copolymerization of Vinyl Chloride onto Ethylene Propylene Rubber (EPR) and Ethylene Propylenediene Monomer (EPDM) by Bulk Process, A. Takahashi, *January, p. 48*

Blends of EPDM and Sulfonated Ethylene-Propylene-Diene (EPDM) Rubber with Polypropylene: Structure, Physical, and Rheological Properties, I. Duvdevani, P. K. Agarwal, and R. D. Lundberg, *Mid-June, p. 499*

Rheology of Polymer Blends: Simultaneous Slippage and Entrance Pressure Loss in the Ethylene-Propylene-Diene (EPDM)/Viton System, R. C. Kanu and M. T. Shaw, *Mid-June, p. 507.*

79. Extended-Chain Morphology

Extended-Chain Morphology in Ultra-oriented Polyethylene, E. M. Macchi and R. De Micheli, *September, p. 836*

80. Extrudate Swell

Swell of Extrudate from an Annular Die, A. Garcia-Rejon and J. M. Dealy, *February, p. 158*

81. Extruders

A Critical Review of Dynamic Modeling and Control of Plasticating Extruders, M. H. Costin, P. A. Taylor, and J. D. Wright, *May, p. 393*

A Plasticating Model for Single-Screw Extruders, H. Fukase, T. Kunio, S. Shinya, and A. Nomura, *June, p. 578*

Devolatilization of Polymer Melts in Single-Screw Extruders, J. A. Biesenberger and G. Kessidis, *September, p. 832*

Numerical Stimulation of a Single-Screw Plasticating Extruder, E. E. Agur and J. Vlachopoulos, *Mid-December, p. 1004*

On the Dynamics and Control of a Plasticating Extruder, M. H. Costin and P. A. Taylor, *Mid-December, p. 1095*

82. Extrusion

Solid-Phase Backward Extrusion of Thermoplastics, R. K. Okine and N. P. Suh, *Mid-April, p. 269*

The Hydrostatic Extrusion and Die-Drawing of Glass-Fiber-Reinforced Polyoxymethylene, P. S. Hope, A. Richardson, and I. M. Ward, *Mid-April, p. 307*

A Network Flow Analysis of Extrusion Dies and Other Flow Systems, M. L. Booy, *May 1982, p. 432*

Analytical Melting Model for Extrusion: Melting Rate of Fully Compacted Solid Polymers, E. M. Mount III, J. G. Watson III, and C. I. Chung, *August, p. 729*

Prediction of Extrusion Pressure Loss of Polymer Melts Flowing Through Noncircular Dies, C. Tiu, *November, p. 1049*

F

83. Failure Modes

A Proposed Model for Accelerated-Stress Life-Test Data Exhibiting Two Failure Modes, G. C. Derringer, *April, p. 354*

84. Fatigue

Effect of Short Glass Fibers and Particulate Fillers on Fatigue Crack Propagation in Polyamides, R. W. Lang, J. A. Manson, and R. W. Hertzberg, *October, p. 982*

Fatigue Crack Propagation in Amorphous Poly(ethylene terephthalate) A. Ramirez, J. A. Manson, and R. W. Hertzberg, *October, p. 975*

An Electrical Method of Measuring Crack Length during Crack Propagation Tests of Polymers, A. M. Serrano, G. E. Welsch, and R. Gibala, *October, p. 934*

On the Law of Fatigue Crack Layer Propagation in Polymers, A. Chudnovsky and A. Moet, *October, p. 922*

85. Fiber

Optimization of Fiber Drawing Processes in Terms of the Filament State Variables, R. H. Butler, D. C. Prevorsek, and Y. D. Kwon, *April, p. 329*

Carbon Fiber-Reinforced Composites: Effect of Fiber Surface on Polymer Properties, Y. S. Ko, W. C. Forsman, and T. S. Dziemianowicz, *September, p. 805*

86. Fiber-Reinforced Composites

Carbon Fiber-Reinforced Composites: Effect of Fiber Surface on Polymer Properties, Y. S. Ko, W. C. Forsman, and T. S. Dziemianowicz, *September, p. 805*

87. Fickian Diffusion

On the Fickian Diffusion of Organic Penetrants in Glassy Polymers, I. Tosun and L. Yilmaz, *November, p. 1043*

88. Filament

Optimization of Fiber Drawing Processes in Terms of the Filament State Variables, R. H. Butler, D. C. Prevorsek, and Y. D. Kwon, *April, p. 329*

89. Filled Polyethylenes

Dynamic Mechanical Behavior of Filled Polyethylenes and Model Composites, V. P. Chacko, F. E. Karasz and R. J. Farris, *October, p. 968*

90. Film-Polypropylene

The Development of Surface Texture in Blown Polypropylene Film, S. Y. Hobbs and C. F. Pratt, *July, p. 594*

91. Film Blowing

Modeling of Polymeric Film-Blowing Processes, R. K. Gupta, A. B. Metzner, and K. F. Wissbrun, *February, p. 172*

92. Filters

Flow, Pressure Distributions, and Internal Forces in Stacked-Disc Filters, M. L. Booy, *Mid-October, p. 895*

93. Fire

Characterization of Plastics in Fire, K. T. Paul, *September, p. 793*

94. Flow

A Network Flow Analysis of Extrusion Dies and Other Flow Systems, M. L. Booy, *May, p. 432*

95. Fluoride

Failure Modes in Piezoelectric Poly (Vinylidene Fluoride), A. G. Kolbeck, *May, p. 444*

96. Fluorine

Estimation of the Effective Permeability of Thin Surface Layers Created by Exposure of Polyethylene to Fluorine, W. J. Koros, V. T. Stannett, and H. B. Hopfenberg, *August, p. 738*

97. Fluorocarbon

The Elastic Change of Volume in Pressurized Bottles Made From Polymeric Materials, R-Y. Wu and Z. H. Stachurski, *Mid-June, p. 472*

98. Foam-Model of Process

Rigid Polyurethane Foams: A Model of the Foaming Process, A. J. Rojas, J. H. Marciano, and R. J. Williams, *September, p. 840*

99. Formation of Polymeric Powders

Effect of Compaction Rate During the Cold Forming of Polymeric Powders, R. J. Crawford, *Mid-April, p. 300*

100. Fractography

Fractography of Polyethylene Glycol Dimethacrylate Doped with Polymethyl Methacrylate, M. Atsuta and D. T. Turner, *December, p. 1199*

101. Fracture

Some Rheological Aspects of Fracture in Thermoforming, J. T. Tsai, *March, p. 265*

Fracture Analysis of Acrylonitrile-Butadiene-Styrene Resins, N. S. Sridharan and L. J. Broutman, *August, p. 760*

102. Fracture Toughness

Fracture Toughness (K_Q) Testing with a Mini-Compact Tension (CT) Specimen, C. Y. Lee and W. B. Jones, Jr., *December, p. 1190*

Time and Temperature Effects on the Fracture Toughness of Rigid Poly (vinylchloride) Pipe Materials, J. F. Mandell, A. Y. Darwish, and F. J. McGarry, *September, p. 826*

G

103. Gas Transport

Effect of Sub-T_g Relaxations on the Gas Transport Properties of Polyesters, R. R. Light and R. W. Seymour, *Mid-October, p. 857*

104. Glass-Reinforced Polyoxymethylene

The Hydrostatic Extrusion and Die-Drawing of Glass-Fiber-Reinforced Polyoxymethylene, P. S. Hope, A. Richardson, and I. M. Ward, *Mid-April, p. 307*

105. Glass Fibers

Effect of Short Glass Fibers and Particulate Fillers on Fatigue Crack Propagation in Polyamides, R. W. Lang, J. A. Manson, and R. W. Hertzberg, *October, p. 982*

106. Glass Transition

Determinaton of the Glass Transition of Polymer by the Autovibron, T. Murayama, *August, p. 788*

107. Gradient (Velocity) Fields

Stress-Induced Diffusion and Chemical Reaction in Nonhomogeneous Velocity Gradient Fields, G. Akay, *September, p. 798*

H

108. Homogeneous Reactors

Computational Scheme for the Calculation of Molecular Weight Distributions for Nylon 6 Polymerization in Homogeneous, Continuous-Flow Stirred-Tank Reactors with Continuous Removal of Water, A. Ramagopal, A. Kumar, and S. K. Gupta, *September, p. 849*

109. Hydrolysis of PET

Hydrolysis of Poly(butylene terephthalate), P. G. Kelleher, R. P. Wentz, and D. R. Falcone, *March, p. 260*

110. Hydrolytic Stability of Some PCs

The Hydrolytic Stability of Some Commercially Available Polycarbonates, C. A. Pryde, P. G. Kelleher, M. Y. Hellman, and R. P. Wentz, *April, p. 370*

111. Hygroelastic Behavior

Anisotropic Hygroelastic Behavior of Poly(methyl methacrylate) Under Case II Diffusion, D. Cohn and G. Marom, *Mid-October, p. 870*

112. Hydrostatic Extrusion

The Hydrostatic Extrusion and Die-Drawing of Glass-Fiber-Reinforced Polyoxymethylene, P. S. Hope, A. Richardson, and I. M. Ward, *Mid-April, p. 307*

I

113. Impingement Mixing

The Influence of Impingement Mixing on Striation Thickness Distribution and Properties in Fast Polyurethane Polymerization, P. Kolodziej, C. W. Macosko, and W. E. Ranz, *April, p. 388*

114. Injection Pressure

Estimation of Injection Pressure During Mold Filling, G. Titomanlio, *Mid-April, p. 324*

115. Injection-Molded Semicrystalline Polymers-Microstructure

The Microstructure of Injection-Molded Semicrystalline Polymers: A Review, S. S. Katti and J. M. Schultz, *November, p. 1001*

Computer Stimulation of Injection Molding, M. R. Kamal and P. G. Lafleur, *Mid-December, p. 1066*

116. Injection Pressure

Estimation of Injection Pressure During Mold Filling, G. Titomanlio, *July, p. 589*

117. Intermolecular

13C NMR Characterization of Intermolecular Interactions for Polymers. Part 3. Solvent Event on the Blend Compatibility of Poly(Vinyl Methyl Ether) and Polystyrene, M. B. Djordjevic and R. S. Porter, *Mid-December, p. 1109*

118. Interpenetrating Networks

Poly(n-butyl acrylate)/Polystyrene Interpenetrating Polymer Networks and Related Materials 1. Dynamic Mechanical Spectroscopy and Morphology, J. K. Yeo, L. H. Sperling, and D. A. Thomas, *February, p. 190*

Recent Advances in Interpenetrating Polymer Networks, K. C. Frisch and D. Klempner, *Mid-December, p. 1143*

119. Ionic Interactions

Compatibilization of the Polystyrene/Poly(Ethyl Acrylate) and Polystyrene/Polyisoprene Systems through Ionic Interactions, A. Eisenberg, P. Smith, and Z-L. Zou, *Mid-December, p. 1117*

120. Ionomers

Temperature Dependence of the Viscoelastic Shift Factor in Ionomers, L. A. Utracki, *Mid-February, p. 81*

121. Isotactic Polypropylene

Effect of the Addition of Ethylene-Propylene Random Copolymers on the Properties of High-Density Polyethylene/Isotactic Polypropylene Blends: Part 1—Morphology and Impact Behavior of Molded Samples, L. D'Orazio, R. Greco, C. Mancarella, E. Martuscelli, G. Ragosta, and C. Silvestre, *June, p. 536*

K

122. Kinetics

Kinetics of a Sterically Hindered Amine-Cured Epoxy Resin System, L. Buckley and D. Roylance, *February, p. 166*

L

123. Lattice-Fluid Equation

An Improved Lattice-Fluid Equation of State for Pure Component Polymeric Fluids, C. Panayiotou and J. H. Vera, *April, p. 345*

124. Liquids and Blends-Thermodynamics

The Thermodynamics of Liquids and Their Blends: High and Low Molecular Weights, R. Simha, *Mid-February, p. 74*

125. Lower Critical Solution Temperature (LCST)

The Lower Critical Solution Temperature (LCST) of Non-Polar Polymer Solutions: An Introduction, T. Somcynsky, *Mid-February, p. 58*

M

126. Maleic Anhydride and Copolymers of Styrene-Blends

Studies of Poly(2,6-Dimethyl-1,4-Phenylene Oxide) Blends: 1. Copolymers of Styrene and Maleic Anhydride, J. R. Fried and G. A. Hanna, *Mid-August, p. 705*

127. Mechanical Properties

Poly(n-butyl acrylate)/Polystyrene Interpenetrating Polymer Networks and Related Materials 1. Dynamic Mechanical Spectroscopy and Morphology, J. K. Yeo, L. H. Sperling and D. A. Thomas, *February, p. 190*

Influence of Molecular Weight and Molecular Weight Distribution on Mechanical Properties of Polymers, R. W. Nunes, J. R. Martin, and J. F. Johnson, *March, p. 205*

Variation of Dynamic Mechanical Properties of Polycarbonate as a Result of Deformation, H. J. Kolman, K. Ard, and C. L. Beatty, *October, p. 950*

Dynamic Mechanical Spectroscopy of Sheet Molding Compound as a Function of Deformation, K. Ard, H. J. Kolman, and C. L. Beatty, *October, p. 994*

128. Mechanistic Studies

Mechanistic Studies of Adhesion Promotion by γ-Aminopropyl Triethoxy Silane in α-Al_2O_3/Polyethylene Joint, N. H. Sung, A. Kaul, I. Chin, and C. S. P. Sung, *July, p. 637*

129. Melt

Melt Rheology of High Impact Polystyrenes at High Shear Stresses, A. Santamaría and G. M. Guzmán, *April, p. 365*

Melt Rheology of Polymer Blends, L. A. Utracki and M. R. Kamal, *Mid-February, p. 96*

Prediction of Extrusion Pressure Loss of Polymer Melts Flowing Through Noncircular Dies, C. Tiu, *November, p. 1049*

Devolatilization of Polymer Melts in Single-Screw Extruders, J. A. Biesenberger and G. Kessidis, *September, p. 832*

Analytical Melting Model for Extrusion: Melting Rate of Fully Compacted Solid Polymers, E. M. Mount III, J. G. Watson III, and C. I. Chung, *August, p. 729*

130. Melt Spinning

Model of Steady-State Melt Spinning at Intermediate Take-Up Speeds, H. H. George, *Mid-April, p. 292*

131. Melt Rheology

Development of Industrial Polyolefin Blends Using Melt Rheology Data, A. P. Pilochocki, *Mid-December, p. 1153*

133. Metering in RIM

Factors Affecting Metering Accuracy in Reaction Injection Molding, O. Olabisi and Y. Gau, *February, p. 182*

134. Microstructures

The Characterization of Blend Microstructure, A. Garton, *Mid-February, p. 124*

The Microstructure of Injection-Molded Semicrystalline Polymers: A Review, S. S. Katti and J. M. Schultz, *November, p. 1001*

135. Miscibility

Miscibility of Poly(α-Methyl Styrene-Co-Acrylonitrile) with Polyacrylates and Polymethacrylates, S. H. Goh, D. R. Paul, and J. W. Barlow, *January, p. 34*

Miscibility Phenomena in Polyester/Chlorinated Polymer Blends, R. E. Prud'Homme, *Mid-February, p. 90*

Some Aspects of the Miscibility Behavior of Polyester/Halogenated Polymer Blends, R. E. Prud'Homme, *Mid-December, p. 1138*

136. Modeling

A Critical Review of Dymanic Modeling and Control of Plasticating Extruders, M. H. Costin, P. A. Taylor, and J. D. Wright, *May, p. 393*

137. Modulus

High Modulus Semi-Crystalline Polymers by Solid State Rolling, D. M. Bigg, E. G. Smith, M. M. Epstein, and R. J. Fiorentino, *January, p. 27*

138. Moisture

Moisture Absorption by Tetraglycidyl 4,4′-diaminodiphenyl Methane/4,4′-diaminodiphenyl Sulfone Epoxies Containing Brominated Epoxy Copolymers, J. Goobich and G. Marom, *November, p. 1052*

139. Moisture and Fatigue Resistance

The Effect of Moisture on the Fatigue Resistance of an Aramid/Epoxy Composite, M. E. Roylance, *October, p. 988*

140. Molding

Factors Affecting Metering Accuracy in Reaction Injection Molding, O. Olabisi and Y. Gau, *February, p. 182*

Estimation of Injection Pressure During Mold Filling, G. Titomanlio, *Mid-April, p. 324*

Thermoset Injection Molding Dynamics and the Distribution of Cure in Thermoset Molded Parts, S. Sidi, and M. R. Kamal, *April, p. 349*

Rotational Molding of Thermosetting Three-Phase Syntactic Foams, M. Narkis, M. Puterman, H. Boneh, and S. Kenig, *May, p. 417*

The Dynamics of Parison Free Inflation in Extrusion Blow Molding, M. E. Ryan and A. Dutta, *June, p. 569*

Residual Stresses in Polymers III: The Influence of Injection-Molding Process Conditions, A. Siegmann, A. Buchman, and S. Kenig, *June, p. 560*

Effect of the Addition of Ethylene-Propylene Random Copolymers on the Properties of High-Density Polyethylene/Isotactic Polypropylene Blends: Part 1—Morphology and Impact Behavior of Molded Samples, L. D'Orazio, R. Greco, C. Mancarella, E. Martuscelli, G. Ragosta, and C. Silvestre, *June, p. 536*

Estimation of Injection Pressure During Mold Filling, G. Titomanlio, *July, p. 589*

141. Molecular Weight Distribution

The Thermodynamics of Liquids and Their Blends: High and Low Molecular Weights, R. Simha, *Mid-February, p. 74*

Influence of Molecular Weight and Molecular Weight Distribution on Mechanical Properties of Polymers, R. W. Nunes, J. R. Martin, and J. F. Johnson, *March, p. 205*

Molecular Weight Distribution of Polyethylene Terephthalate in Homogeneous, Continuous-Flow-Stirred Tank Reactors, A. Kumar, S. K. Gupta, and N. Somu, *Mid-April, p. 314*

Observation of Molecular Chain Scission during Crazing of Polystyrene, R. Popli and D. Roylance, *November, p. 1046*

Computational Scheme for the Calculation of Molecular Weight Distributions for Nylon 6 Polymerization in Homogeneous, Continuous-Flow Stirred-Tank Reactors with Continuous Removal of Water, A. Ramagopal, A. Kumar, and S. K. Gupta, *September, p. 849*

142. Molten PET

The Principles of Pipe-Line Design for Molten Poly(Ethylene Terephthalate), Z. Kemblowski and J. Torzecki, *February, p. 141*

143. Morphology

Poly(n-butyl acrylate)/ Polystyrene Interpenetrating Polymer Networks and Related Materials 1. Dynamic Mechanical Spectroscopy and Morphology, J. K. Yeo, L. H. Sperling, and D. A. Thomas, *February, p. 190*

Property-Morphology Relationships of Polymethylmethacrylate/Polyvinylidenefluoride Blends, J. Mijovic, H-L. Luo, and C. D. Han, *March, p. 234*

Extended-Chain Morphology in Ultra-oriented Polyethylene, E. M. Macchi and R. de Micheli, *September, p. 836*

Time-Dependent Morphologies and Viscoelastic Properties of Block Copolymers, J. C. Kelterborn and D. S. Soong, *Mid-August, p. 6*

144. Multicomponent Melts

Effect of Composition and Processing on Rheological Properties of Multicomponent Polymer Melts, S. Ahuja, H. Chang, and R. Schreiber, *Mid-August, p. 692*

N

145. Networks

A Network Flow Analysis of Extrusion Dies and Other Flow Systems, M. L. Booy, *May, p. 432*

Strength and Structure of Glassy Networks Formed from Dimethacrylates, M. Atsuta and D. T. Turner, *May, p. 438*

146. NH_3 Absorption by Nylon-6

Absorption of NH_3 by Nylon-6, A. E. Zachariades, T. Kanamoto, and R. S. Porter, *Mid-June, p. 519*

147. N-Lauryl-methacrylate

Rheokinetics of Polymerization of N-Lauryl-methacrylate, L. T. Kale and K. F. O'Driscoll, *May, p. 402*

148. Noncircular Dies

Prediction of Extrusion Pressure Loss of Polymer Melts Flowing Through Noncircular Dies, C. Tiu, *November, p. 1049*

150. Non-Polar Solutions

The Lower Critical Solution Temperature (LCST) of Non-Polar Polymer Solutions: An Introduction, T. Somcynsky, *Mid-February, p. 58*

151. Numerical Stimulation

Numerical Stimulation of a Single-Screw Plasticaling Extruder, E. E. Agur and J. Vlachopoulos, *Mid-December, p. 1004*

152. Nylon-6

Absorption of NH_3 by Nylon-6, A. E. Zachariades, T. Kanamoto, and R. S. Porter, *Mid-June, p. 519*

Computational Scheme for the Calculation of Molecualr Weight Distributions for Nylon-6 Polymerization in Homogeneous, Continuous-Flow Stirred-Tank Reactors with Continuous Removal of Water, A. Ramagopal, A. Kumar, and S. K. Gupta, *September, p. 849*

O

153. Oil, Silicone-Effect in Polystyrene

Environmental Effects of Silicone Oil on Tensile and Fatigue Properties of Polystyrene, C. C. Chen, D. R. Morrow, and J. A. Sauer, *May, p. 451*

154. Opportunities in Rubber Blends

Rubber Blends Opportunities For Future Research, R. F. Bauer, *Mid-February, p. 130*

155. Optical Properties of PET

Optical Properties of Thermally Crystallized Poly(ethylene terephthalate), S. A. Jabarin, *September, p. 815*

156. Optimization Fiber Drawing

Optimization of Fiber Drawing Processes in Terms of the Filament State Variables, R. H. Butler, D. C. Prevorsek, and Y. D. Kwon, *April, p. 329*

157. Organic Penetrants

On the Fickian Diffusion of Organic Penetrants in Glassy Polymers, I. Tosun and L. Yilmaz, *November, p. 1043*

158. Oxidized Polyethylene Pipe

Structure and Morphology of Thermally Oxidized High Density Polyethylene Pipes, B. Terselius, U. W. Gedde, and J-F. Jansson, *May, p. 422*

P

160. Parison-Free Inflation

The Dynamics of Parison Free Inflation in Extrusion Blow Molding, M. E. Ryan and A. Dutta, *June, p. 569*

161. Particle Filler

Rheological Analysis of Highly Loaded Polymeric Composites Filled with Non-Agglomerating Spherical Filler Particles, D. M. Bigg, *Mid-June, p. 512*

162. Particulate-Filled Thermosets

Curing Characteristics of Particulate-Filled Thermosets, S. H. McGee, *Mid-June, p. 484*

Effect of Short Glass Fibers and Particulate Fillers on Fatigue Crack Propagation in Polyamides, R. W. Lang, J. A. Manson, and R. W. Hertzberg, *October, p. 982*

163. Patent Literature on Reactivity of EVA Copolymers

Reactivity of Ethylene Vinyl Acetate Copolymers: A Critical Evaluation of the Comprehensive Patent Literature on the Acetoxy-hydroxide Transformation of Ethylene Vinyl Acetate Copolymers, R. J. Koopmans, R. Van Der Linden, and E. F. Vansant, *July, p. 645*

164. Penetrants, Organic

On the Fickian Diffusion of Organic Penetrants in Glassy Polymers, I. Tosun and L. Yilmaz, *November, p. 1043*

165. Permeability of Surface Layers

Estimation of the Effective Permeability of Thin Surface Layers Created by Exposure of Polyethylene to Fluorine, W. J. Koros, V. T. Stannett, H. B. Hopfenberg, *August, p. 738*

166. Permeation, Gel

A Note on the Prediction of Polyethylene Melt Rheological Properties From Molecular Weight Distribution Data Obtained by Gel Permeation Chromatography, B. H. Shah and R. Darby, *January, p. 53*

167. Phase Separation

Experimental Studies of Phase Separation in Reaction Injection-Molded (RIM) Polyurethanes, R. E. Camargo, C. W. Macosko, M. V. Tirrell, and S. T. Wellinghoff, *Mid-August, p. 719*

168. Phenolic-Electrical Conductivity

Electrical Conductivity Changes Associated With Thermal Decomposition of Phenolic- and Silicone-Based Materials, R. T. Johnson, Jr. and R. M. Biefeld, *February, p. 147*

169. Phosphorus-Degradation of PU, by

Degradation of Polyurethane Containing Phosphorus, N. Grassie, *November, p. 1057*

170. Photo-Oxidation

Photo-Oxidation and Photo-Stabilization of Blends of Low-Density Polyethylene and Styrene-Butadiene-Styrene Copolymers, C. David, F. Zabeau, and R. A. Jacobs, *Mid-October, p. 912*

171. Photo-Stabilization

Photo-Oxidation and Photo-Stabilization of Blends of Low-Density Polyethylene and Styrene-Butadiene-Styrene Copo'ymers, C. David, F. Zabeau, and R. A. Jacobs, *Mid-October, p. 912*

172. Piezoelectric PVDC-Failure Modes

Failure Modes in Piezoelectric Poly(Vinylidene Fluoride), A. G. Kolbeck, *May, p. 444*

173. Pipe-Line Design for PET

The Principles of Pipe-Line Design for Molten Poly(Ethylene Terephthalate), Z. Kemblowski and J. Torzecki, *February, p. 141*

174. Pipe Materials

Time and Temperature Effects on the Fracture Toughness of Rigid Poly(vinylchloride) Pipe Materials, J. F. Mandell, A. Y. Darwish, and F. J. McGarry, *September, p. 826*

175. Plasticating

A Critical Review of Dynamic Modeling and Control of Plasticating Extruders, M. H. Costin, P. A. Taylor, and J. D. Wright, *May, p. 393*

A Plasticating Model for Single-Screw Extruders, H. Fukase, T. Kunio, S. Shinya, and A. Nomura, *June, p. 578*

On The Dynamics and Control of a Plasticating Extruder, M. H. Costin and P. A. Taylor, *Mid-December, p. 1095*

Numerical Stimulation of a Single-Screw Plasticating Extruder, E. E. Agur and J. Vlachopoulos, *Mid-December, p. 1004*

176. Plastics-PV Under Sliding

The Limiting Pressure-Velocity (PV) of Plastics Under Unlubricated Sliding, Y. Yamaguchi and K. Kashiwagi, *March p. 248*

177. Plastics-Energy, Fires

Energy Conservation in Plastics Processing: A Review, J. M. Dealy, *June, p. 528*

Characterization of Plastics in Fire, K. T. Paul, *September, p. 793*

178. PET-Long-Term Performance

The Effect of Temperature and Humidity on the Long-Term Performance of Poly(Butylene Terephthalate) Compounds, W. F. H. Borman, *Mid-October, p. 883*

179. Poly(Ethyl Acrylate)/Polystyrene

Compatibilization of the Polystyrene/Poly(Ethyl Acrylate) and Polystyrene/Polyisoprene Systems Through Ionic Interactions, A. Eisenberg, P. Smith, and Z-L. Zhou, *Mid-December, p. 1117*

180. Poly(Ethylene Terephthalate) Reactors-Modeling

Modeling of Poly(Ethylene Terephthalate) Reactors: 4. A Continuous Esterification Process, K. Ravindranath and R. A. Mashelkar, *July, p. 610*

Modeling of Poly(Ethylene Terephthalate) Reactors: 5. A Continuous Prepolymerization Process, K. Ravindranath and R. A. Mashelkar, *July, p. 619*

Modeling of Poly(Ethylene Terephthalate) Reactors: 6. A Continuous Process for Final Stages of Polycondensation, K. Ravindranath and R. A. Mashelkar, *July, p. 628*

Optical Properties of Thermally Crystallized Poly(ethylene terephthalate), S. A. Jabarin, *September, p. 815*

181. Poly(methyl methacrylate)-Anisotropic Hygroelastic Behavior

Anisotropic Hygroelastic Behavior of Poly(methyl methacrylate) Under Case II Diffusion, D. Cohn and G. Marom, *Mid-October, p. 870*

182. Poly(vinylchloride)-Compatibility

Mechanical Criteria for Polymer Compatibility: Poly(vinylchloride) Postchlorinated Poly (vinyl chloride) Blends, D. D. Clark, E. A. Collins, and L. W. Kleiner, *Mid-August, p. 698*

183. Poly(Vinyl Methyl Ether)-Compatibility

13C NMR Characterization of Intermolecular Interactions For Polymers. Part 3. Solvent Event on the Blend Compatibility of Poly(Vinyl Methyl Ether) and Polystyrene, M. B. Djordjevic and R. S. Porter, *Mid-December, p. 1109*

184. Poly(2,6-Dimethyl-1,4 Phenylene Oxide) Blends

Studies of Poly(2,6-Dimethyl-1,4 Phenylene Oxide) Blends: 1. Copolymers of Styrene and Maleic Anhydride, J. R. Fried and G. A. Hanna, *Mid-August, p. 705*

185. Polyacrylates Miscibility

Miscibility of Poly(α-Methyl Styrene-Co-Acrylonitrile) with Polyacrylates and Polymethacrylates, S. H. Goh, D. R. Paul, and J. W. Barlow, *January, p. 34*

186. Polyamides

Effect of Short Glass Fibers and Particulate Fillers on Fatigue Crack Propagation in Polyamides, R. W. Lang, J. A. Manson, and R. W. Hertzberg, *October, p. 982*

Some Solid-State Properties of Blends of Polyethylene Terephthalate and Polyamide 6-6, M. R. Kamal and M. A. Sahto, *Mid-December, p. 1127*

187. Polybutylene Terephthalate (PBTP)

The Transesterification of Bisphenol-A Polycarbonate (PC) and Polybutylene Terephthalate (PBTP): A New Route to Block Copolycondensates, J. Devaux, P. Godard, and J. P. Mercier, *March, p. 229*

Hydrolysis of Poly(butylene terephthalate), P. G. Kelleher, R. P. Wentz, and D. R. Falcone, *March, p. 260*

188. Polycarbonates

The Hydrolytic Stability of Some Commercially Available Polycarbonates, C. A. Pryde, P. G. Kelleher, M. Y. Hellman, and R. P. Wentz, *April, p. 370*

Tensile Failure of Weathered Polycarbonate, E. S. Sherman, A. Ram, and S. Kenig, *Mid-June, p. 457*

Fatigue Fracture of Polycarbonate, M. T. Takemori, *October, p. 937*

Use of Dielectric Relaxation Spectroscopy to Monitor Deformation of Polycarbonate, K. Venkataswamy, K. Ard, and C. L. Beatty, *October, p. 955*

189. Polycondensation

Modeling of Poly(Ethylene Terephthalate) Reactors: 6. A Continuous Process for Final Stages of Polycondensation, K. Ravindranath and R. A. Mashelkar, *July, p. 628*

190. Polyesters

Miscibility Phenomena in Polyester/Chlorinated Polymer Blends, R. E. Prud'homme, *Mid-February, p. 90*

A Dynamic Mechanical Study of the Curing Reaction of an Unsaturated Polyester, C. Y. Yap and H. L. Williams, *March, p. 254*

Unsaturated Polyesters from 2,2-Dimethyl-1,3-propanediol, S. N. Tong and H. K. Horng, *June, p. 556*

Effect of Sub-T_g Relaxations on the Gas Transport Properties of Polyesters, R. R. Light and R. W. Seymour, *Mid-October, p. 857*

191. Polyester/Halogenated Blends

Some Aspects of the Miscibility Behavior of Polyester/Halogenated Polymer Blends, R. E. Prud'homme, *Mid-December, p. 1138*

192. Polyethylene

A Note on the Prediction of Polyethylene Melt Rheological Properties From Molecular Weight Distribution Data Obtained by Gel Permeation Chromatography, B. H. Shah and R. Darby, *January, p. 53*

Shear-Induced Anisotropy in Thermal Conductivity of a Polyethylene Melt,

J. J. C. Picot, G. I. Goobie, and G. S. Mawhinney, *February, p. 154*

Processing Properties of High- and Low-Density Polyethylenes and Their Blends, B. Maxwell, E. J. Dormier, F. P. Smith, and P. P. Tong, *Mid-April, p. 280*

The Effect of Bromination and Inherent Vinyl Unsaturation on the Drawing Behavior of High-Density Polyethylene, T. Tincer and G. Akay, *May, p. 410*

Structure and Morphology of Thermally Oxidized High Density Polyethylene Pipes, B. Terselius, U. W. Gedde, and J-F. Jansson, *May, p. 422*

The Effect of Bromination and Inherent Vinyl Unsaturation on the Drawing Behavior of High-Density Polyethylene, T. Tincer and G. Akay, *May, p. 410*

Structure and Morphology of Thermally Oxidized High Density Polyethylene Pipes, B. Terselius, U. W. Gedde, and J-F. Jansson, *May, p. 422*

Effect of the Addition of Ethylene-Propylene Random Copolymers on the Properties of High-Density Polyethylene/Isotactic Polypropylene Blends: Part 1—Morphology and Impact Behavior of Molded Samples, L. D'Orazio, R. Greco, C. Mancarella, E. Martuscelli, G. Ragosta, and C. Silvestre, *June, p. 536*

Fracture Surface Features of Polyethylene Pipe Samples, C. S. Lee and M. M. Epstein, *June, p. 549*

Photo-Oxidation and Photo-Stabilization of Blends of Low-Density Polyethylene and Styrene-Butadiene-Styrene Copolymers, C. David, F. Zabeau, and R. A. Jacobs, *Mid-October, p. 912*

Extended-Chain Morphology in Ultra-oriented Polyethylene, E. M. Macchi and R. De Micheli, *September, p. 836*

Optical Properties of Thermally Crystallized Poly(ethylene terephthalate), S. A. Jabarin, *September, p. 815*

Estimation of the Effective Permeability of Thin Surface Layers Created by Exposure of Polyethylene to Fluorine, W. J. Koros, V. T. Stannett, H. B. Hopfenberg, *August, p. 738*

Extended-Chain Morphology in Ultra-oriented Polyethylene, E. M. Macchi and R. De Micheli, *September, p. 836*

193. Polyethylene Glycol Dimethacrylate

Fractography of Polyethylene Glycol Dimethacrylate Doped with Polymethyl Methacrylate, M. Atsuta, and D. T. Turner, *December, p. 1199*

194. Polyethylene Terephthalate and Polyamide 6-6 Blends-Solid-State Properties

Some Solid-State Properties of Biends of Polyethylene Terephthalate and Polyamide 6-6, M. R. Kamal, and M. A. Sahto, *Mid-December, p. 1127*

195. Polyimide

Addition Polyimide Adhesives Containing Various End Groups, A. K. St. Clair and T. L. St. Clair, *January, p. 9.*

196. Polyisoprene/Polystyrene Systems-Compatibilization

Compatibilization of the Polystyrene/Poly(ethyl Acrylate) and Polystyrene/Polyisoprene Systems through Ionic Interactions, A. Eisenberg, P. Smith, and Z-L. Zou, *Mid-December, p. 1117*

200. Polymethacrylates-Miscibility

Miscibility of Poly(α-Methyl Styrene-Co-Acrylonitrile) with Polyacrylates and Polymethacrylates, S. H. Goh, D. R. Paul, and J. W. Barlow, *January, p. 34*

201. Polymethylmethacrylate-Property-Morphology in Blends

Property-Morphology Relationships of Polymethylmethacrylate/Polyvinylidenefluoride Blends, J. Mijovic, H-L. Luo, and C. D. Han, *March, p. 234*

202. Poly(n-butyl acrylate)

Poly(n-butyl acrylate)/Polystyrene Interpenetrating Polymer Networks and Related Materials 1. Dynamic Mechanical Spectroscopy and Morphology, J. K. Yeo, L. H. Sperling and D. A. Thomas, *February, p. 190*

204. Polyoxymethylene

The Hydrostatic Extrusion and Die-Drawing of Glass-Fiber-Reinforced Polyoxymethylene, P. S. Hope, A. Richardson, and I. M. Ward, *Mid-April, p. 307*

205. Polyphenylene Oxide and Blends

Fracture Toughness and Fatigue of Polystyrene, Polyphenylene Oxide and Their Blends, A. M. Serrano, G. E. Welsch, and R. Gibala, *October, p. 946*

206. Polypropylene

Effects of High Oxygen Pressure and Temperature on the Aging of Polypropylene, D. L. Faulkner, *Mid-June, p. 466*

Blends of EPDM and Sulfonated Ethylene-Propylene-Diene (EPDM) Rubber with Polypropylene: Structure, Physical, and Rheological Properties, I. Duvdevani, P. K. Agarwal, and R. D. Lundberg, *Mid-June, p. 499*

Effect of the Addition of Ethylene-Propylene Random Copolymers on the Properties of High-Density Polyethylene/Isotactic Polypropylene Blends: Part 1—Morphology and Impact Behavior of Molded Samples, L. D'Orazio, R. Greco, C. Mancarella, E. Martuscelli, G. Ragosta, and C. Silvestre, *June, p. 536*

The Development of Surface Texture in Blown Polypropylene Film, S. Y. Hobbs and C. F. Pratt, *July, p. 594*

207. Polystyrene

Melt Rheology of High Impact Polystyrenes at High Shear Stresses, A. Santamaría and G. M. Guzmán, *April, p. 365*

Poly(n-butyl acrylate)/Polystyrene Interpenetrating Polymer Networks and Related Materials 1. Dynamic Mechanical Spectroscopy and Morphology, J. K. Yeo, L. H. Sperling, and D. A. Thomas, *February, p. 190*

Environmental Effects of Silicone Oil on Tensile and Fatigue Properties of Polystyrene, C. C. Chen, D. R. Morrow, and J. A. Sauer, *May, p. 451*

Observation of Molecular Chain Scission during Crazing of Polystyrene, R. Popli and D. Roylance, *November, p. 1046*

Fracture Toughness and Fatigue of Polystyrene, Polyphenylene Oxide and Their Blends, A. M. Serrano, G. E. Welsch, and R. Gibala, *October, p. 946*

Relationship Between Rheological Properties and Impact Strength in High Impact Polystyrene, M. D. Dalal and R. C. Armstrong, *Mid-August, p. 684*

The Mechanical Properties of Styrene-Butadiene-Styrene (SBS) Triblock Copolymer Blends with Polystyrene (PS) and Styrene-Butadiene Copolymer (SBR), J. Diamant, D. Soong, and M. C. Williams, *Mid-August, p. 673*

13C NMR Characterization of Intermolecular Interactions for Polymers. Part 3. Solvent Event on the Blend Compatibility of Poly(Vinyl Methyl Ether) and Polystyrene, M. B. Djordjevic and R. S. Porter, *Mid-December, p. 1109*

Compatibilization of the Polystyrene/Poly(Ethyl Acrylate) and Polystyrene/Polyisoprene Systems through Ionic Interactions, A. Eisenberg, P. Smith, and Z-L. Zhou, *Mid-December, p. 1117*

208. Polyurethane

The Influence of Impingement Mixing on Striation Thickness Distribution and Properties in Fast Polyurethane Polymerization, P. Kolodziej, C. W. Macosko, and W. E. Ranz, *April, p. 388*

Degradation of Polyurethane Containing Phosphorus, N. Grassie, *November, p. 1057*

Composition and Process Effects on the Properties of One-Component Polyurethanes, S. A. Iobst and H. W. Cox, *December, p. 1177*

Studies on Polyurethane Protective Surface Material Resistance to Cavitation Erosion, X. H. Xiong, G. X. Min, Z. Q. Tao, X. S. Li, and C. R. Zhi, *August, p. 752*

Experimental Studies of Phase Separation in Reaction Injection-Molded (RIM) Polyurethanes, R. E. Camargo, C. W. Macosko, M. V. Tirrell, and S. T. Wellinghoff, *Mid-August, p. 719*

210. Polyvinylidenefluoride

Property-Morphology Relationships of Polymethylmethacrylate/Polyvinyli-

denefluoride Blends, J. Mijovic, H-L. Luo, and C. D. Han, *March, p. 234*

211. Post-chlorinated PVC

Mechanical Criteria for Polymer Compatibility: Poly(vinylchloride)/Post-chlorinated Poly(vinyl-chloride) Blends, D. D. Clark, E. A. Collins, and L. W. Kleiner, *Mid-August, p. 698*

212. Polymeric Powders-Cold Forming

Effect of Compaction Rate During the Cold Forming of Polymeric Powders, R. J. Crawford, *Mid-April, p. 300*

214. Prepolymerization-Modeling of PET Reactors

Modeling of Poly(Ethylene Terephthalate) Reactors: 5. A Continuous Prepolymerization Process, K. Ravindranath and R. A. Mashelkar, *July, p. 619*

215. Pressure Effects

Estimation of Injection Pressure During Mold Filling, G. Titomanlio, *Mid-April, p. 324*

Rheology of Polymer Blends: Simultaneous Slippage and Entrance Pressure Loss in the Ethylene-Propylene-Diene (EPDM)/Viton System, R. C. Kanu and M. T. Shaw, *Mid-June, p. 507*

Effects of High Oxygen Pressure and Temperature on the Aging of Polypropylene, D. L. Faulkner, *Mid-June, p. 466.*

The Elastic Change of Volume in Pressurized Bottles Made From Polymeric Materials, R-Y. Wu and Z. H. Stachurski, *Mid-June, p. 472*

R

218. Reaction Injection Molding

Experimental Studies of Phase Separation in Reaction Injection-Molded (RIM) Polyurethanes, R. E. Camargo, C. W. Macosko, M. V. Tirrell, and S. T. Wellinghoff, *Mid-August, p. 719*

Factors Affecting Metering Accuracy in Reaction Injection Molding, O. Olabisi and Y. Gau, *February, p. 182*

220. Resistivity

The Relationship of Carbon Black Dispersion to Electrical Resistivity and Vulcanizate Physical Properties, R. J. Cembrola, *July, p. 601*

221. Relaxation Spectroscopy

Use of Dielectric Relaxation Spectroscopy to Monitor Deformation of Polycarbonate, K. Venkataswamy, K. Ard, and C. L. Beatty, *October, p. 155*

Dynamic Mechanical Spectroscopy of Sheet Molding Compound as a Function of Deformation, K. Ard, H. J. Kolman, and C. L. Beatty, *October, p. 994*

224. Rheokinetics

Rheokinetics of Polymerization of N-Lauryl-methacrylate, L. T. Kale and K. F. O'Driscoll, *May, p. 402*

225. Rheology

Note on the Prediction of Polyethylene Melt Rheological Properties From Molecular Weight Distribution Data Obtained by Gel Permeation Chromatography, B. H. Shah and R. Darby, *January, p. 53*

Melt Rheology of High Impact Polystyrenes at High Shear Stresses, A. Santamaría and G. M. Guzmán, *April, p. 365*

Rheology of Polymer Blends: Simultaneous Slippage and Entrance Pressure Loss in the Ethylene-Propylene-Diene (EPDM)/-Viton System, R. C. Kanu and M. T. Shaw, *Mid-June, p. 507*

Blends of EPDM and Sulfonated Ethylene-Propylene-Diene (EPDM) Rubber with Polypropylene: Structure, Physical, and Rheological Properties, I. Duvdevani, P. K. Agarwal, and R. D. Lundberg, *Mid-June p. 499*

Rheological Analysis of Highly Loaded Polymeric Composites Filled with Non-Agglomerating Spherical Filler Particles, D. M. Bigg, *Mid-June, p. 512*

Relationship Between Rheological Properties and Impact Strength in High Impact Polystyrene, M. D. Dalal and R. C. Armstrong, *Mid-August, p. 684*

Rheology of Reinforced Thermoplastics and Its Application to Injection-Molding: IV. Transient Injection Capillary Flow and Injection-Molding, G. Akay, *November, p. 1027*

229. Rubber Blends

Rubber Blends Opportunities For Future Research, R. F. Bauer, *Mid-February, p. 130*

Blends of EPDM and Sulfonated Ethylene-Propylene-Diene (EPDM) Rubber with Polypropylene: Structure, Physical, and Rheological Properties, I. Duvdevani, P. K. Agarwal, and R. D. Lundberg, *Mid-June, p. 499*

The Effect of Surface Embrittlement on the Mechanical Behavior of Rubber-Modified Polymers, P. So and L. J. Broutman, *Mid-October, p. 888*

S

230. Scission

Observation of Molecular Chain Scission during Crazing of Polystyrene, R. Popli and D. Roylance, *November, p. 1046*

231. Semicrystalline Polymers

The Microstructure of Injection-Molded Semicrystalline Polymers: A Review, S. S. Katti and J. M. Schultz, *November, p. 1001*

232. Shear Stresses

Shear-Induced Anisotropy in Thermal Conductivity of a Polyethylene Melt, J. J. C. Picot, G. I. Goobie, and G. S. Mawhinney, *February, p. 154*

Melt Rheology of High Impact Polystyrenes at High Shear Stresses, A. Santamaría and G. M. Guzmán, *April, p. 365*

233. Shear Rate

Effect of Shear Rate on Solution Polymerization of Acrylonitrile, A. Kumar and S. K. Gupta, *December, p. 1184*

234. Shift Factor

Temperature Dependence of the Viscoelastic Shift Factor in Ionomers, L. A. Utracki, *Mid-February, p. 81*

235. Sheet Molding Compound

Dynamic Mechanical Spectroscopy of Sheet Molding Compound as a Function of Deformation, K. Ard, H. J. Kolman, and C. L. Beatty, *October, p. 994*

236. Silane

Mechanistic Studies of Adhesion Promotion by γ-Aminopropyl Triethoxy Silane in α-Al_2O_3/Polyethylene Joint, N. H. Sung, A. Kaul, I. Chin, and C. S. P. Sung, *July, p. 637*

237. Silicone

Electrical Conductivity Changes Associated With Thermal Decomposition of Phenolic- and Silicone-Based Materials, R. T. Johnson, Jr. and R. M. Biefeld, *February, p. 147*

Environmental Effects of Silicone Oil on Tensile and Fatigue Properties of Polystryrene, C. C. Chen, D. R. Morrow, and J. A. Sauer, *May, p. 451*

238. Siloxane-Poly(methacrylate) Blends

Siloxane-Poly(methylmethacrylate) Amphoteric Blends, T. T. Blahovicci, G. R. Brown, L. E. St. Pierre, *Mid-December, p. 1123*

239. Single-Screw Extruders

A Plasticating Model for Single-Screw Extruders, H. Fukase, T. Kunio, S. Shinya, and A. Nomura, *June, p. 578*

Devolatilization of Polymer Melts in Single-Screw Extruders, J. A. Biesenberger and G. Kessidis, *September, p. 832*

Numerical Stimulation of a Single-Screw Plasticating Extruder, E. E. Agur, and J. Vlachopoulos, *Mid-December, p. 1004*

240. Slippage

Rheology of Polymer Blends: Simultaneous Slippage and Entrance Pressure Loss in the Ethylene-Propylene-Diene (EPDM)/-Viton System, R. C. Kanu and M. T. Shaw, *Mid-June, p. 507*

241. Slit Flow

Capillary and Slit Flow Behavior of Concentrated Solutions of a Rod-like Polymer, C. H. Kao and D. G. Baird, *June, p. 521*

Slit Flow of Molten Polyethylene Filled with Plastic Flakes, S. Suto and T. Fujimura, *February, p. 197*

242. *Solid State Rolling*

High Modulus Semi-Crystalline Polymers by Solid State Rolling, D. M. Bigg, E. G. Smith, M. M. Epstein, and R. J. Fiorentino, *January, p. 27*

243. *Solvent*

Polymer Compatibility With and Without a Solvent, D. Patterson, *Mid-February, p. 64*

244. *Spectroscopy and Morphology*

Poly(n-butyl acrylate)/Polystyrene Interpenetrating Polymer Networks and Related Materials I. Dynamic Mechanical Spectroscopy and Morphology, J. K. Yeo, L. H. Sperling and D. A. Thomas, *February, p. 190*

245. *Spherical Filler Particles*

Rheological Analysis of Highly Loaded Polymeric Composites Filled with Non-Agglomerating Spherical Filler Particles, D. M. Bigg, *Mid-June p. 512*

247. *Stacked Disc Fillers*

Flow, Pressure Distributions, and Internal Forces in StackedDisc Filters, M. L. Booy, *Mid-October, p. 895*

250. *Stresses, Residuals, in Polymers*

Residual Stresses in Polymers I: The Effect of Thermal History, A. Siegmann, A. Buchman and S. Kenig, *January, p. 40*

252. *Striation in Fast Polyurethane Polymerization*

The Influence of Impingement Mixing on Striation Thickness Distribution and Properties in Fast Polyurethane Polymerization, P. Kolodziej, C. W. Macosko, and W. E. Ranz, *April, p. 288*

253. *Styrene*

Photo-Oxidation and Photo-Stabilization of Blends of Low-Density Polyethylene and Styrene-Butadiene-Styrene Copolymers, C. David, F. Zabeau, and R. A. Jacobs, *Mid-October p. 912*

Aging of Pressure-Sensitive Adhesives I: Stability of Styrene-Isoprene-Styrene Block Copolymer Films at 95°C, D. J. P. Harrison, J. F. Johnson, and W. R. Yates, *Mid-October, p. 865*

254. *Styrene-Butadiene*

The Mechanical Properties of Styrene-Butadiene-Styrene (SBS) Triblock Copolymer Blends with Polystyrene (PS) and Styrene-Butadiene Copolymer (SBR), J. Diamant, D. Soong, and M. C. Williams, *Mid-August, p. 673*

Multiphase Polymer Processing: Controlled-Ingredient-Distribution Mixing and Its Effect on Some Properties of Styrene-Butadiene (SBR)/Butadiene-Acrylonitrile Copolymer Rubber Blend Compounds, B-L. Lee, *Mid-October, p. 912*

Photo-Oxidation and Photo-Stabilization of Blends of Low-Density Polyethylene and Styrene-Butadiene-Styrene Copolymers, C. David, F. Zabeau, and R. A. Jacobs, *Mid-October p. 912*

256. *Styrene-Batch Polymerization*

Batch Polymerization of Styrene-Optimal Temperature Histories, G. Z. A. Wu, L. A. Denton, and R. L. Laurence, *January, p. 1*

257. *Sub-T_g, Effect of*

Effect of Sub-T_g Relaxations on the Gas Transport Properties of Polyesters, R. R. Light and R. W. Seymour, *Mid-October, p. 857*

Studies of Epoxy Resin Systems: Part D: Fracture Toughness of an Epoxy Resin: A Study of the Effect of Crosslinking and Sub-T_g Aging, T. D. Chang and J. O. Brittain, *December, p. 1228*

Studies of Epoxy Resin Systems: Part C: Effect of Sub-T_g Aging on the Physical Properties of a Fully Cured Epoxy Resin, J. O. Chang, T. D. Brittain, *December, p. 1213*

258. *Sulfonate EPDM and EPDM Blends*

Blends of EPDM and Sulfonated Ethylene-Propylene-Diene (EPDM) Rubber with Polypropylene: Structure, Physical, and Rheological Properties, I. Duvdevani, P. K. Agarwal, and R. D. Lundberg, *Mid-June, p. 499*

260. *Surface Layers-Effect Permeability*

Estimation of the Effective Permeability of Thin Surface Layers Created by Exposure of Polyethylene to Fluorine, W. J. Koros, V. T. Stannett, H. B. Hopfenberg, *August, p. 738*

261. *Swelling in Glassy Polymers*

Diffusion and Localized Swelling Resistances in Glassy Polymers, C. Gostoli and G. C. Sarti, *November, p. 1018*

262. *Syntactic Foams*

Rotational Molding of Thermosetting Three-Phase Syntactic Foams, M. Narkis, M. Puterman, H. Boneh, and S. Kenig, *May, p. 417*

T

264. *Temperature Effects on Aging of Polypropylene*

Effects of High Oxygen Pressure and Temperature on the Aging of Polypropylene, D. L. Faulkner, *Mid-June, p. 466*

266. *Tensile Properties, Effect on*

Environmental Effects of Silicone Oil on Tensile and Fatigue Properties of Polystyrene, C. C. Chen, D. R. Morrow, and J. A. Sauer, *May, p. 451*

Tensile Failure of Weathered Polycarbonate, E. S. Sherman, A. Ram, and S. Kenig, *Mid-June, p. 457*

268. *Terpolymers-Thermal Aging and Stabilization of Grafted ABS*

Methods for Study of Thermal Aging and Stabilization of Grafted Acrylonitrile-Butadiene-Styrene (ABS) Terpolymers, D. M. Chang, *April, p. 376*

270. *Thermal*

Residual Stresses in Polymers I: The Effect of Thermal History, A. Siegmann, A. Buchman, and S. Kenig, *January, p. 40*

Shear-Induced Anisotropy in Thermal Conductivity of a Polyethylene Melt, J. J. C. Picot, G. I. Goobie, and G. S. Mawhinney, *February, p. 154*

Electrical Conductivity Changes Associated With Thermal Decomposition of Phenolic- and Silicone-Based Materials, R. T. Johnson, Jr. and R. M. Biefeld, *February, p. 147*

An Analysis of Thermal Warpage in Injection Molded Flat Parts Due to Unbalanced Cooling, M. St. Jacques, *March, p. 241*

Methods for Study of Thermal Aging and Stabilization of Grafted Acrylonitrile-Butadiene-Styrene (ABS) Terpolymers, D. M. Chang, *April, p. 376*

Low Temperature Thermal Aging of Ethylene Vinyl Alcohol Copolymers, A. Apicella, H. B. Hopfenberg, and S. Piccarolo, *April, p. 382*

Influence of the Thermal History on Dielectric Properties of Poly(Vinyl Chloride), R. D. Calleja and J. L. G. Ribelles, *September, p. 845*

Optical Properties of Thermally Crystallized Poly(ethylene terephthalate), S. A. Jabarin, *September, p. 815*

Studies of Epoxy Resin System: Part A: A Study of the Origins of the Secondary Relaxations of Epoxy Resins by thermally Stimulated Depolarization, T. D. Chang, S. H. Carr, and J. O. Brittain, *December p. 1205*

272. *Thermodynamics*

The Thermodynamics of Liquids and Their Blends: High and Low Molecular Weights, R. Simha, *Mid-February, p. 74*

Thermodynamic Aspects in Extrusion of Wall-Slipping Materials, G. Mennig and N. Subramanian, *August, p. 747*

273. *Thermoforming*

Some Rheological Aspects of Fracture in Thermoforming, J. T. Tsai, *March p. 265*

276. *Time-Dependent Effects*

Time-Dependent Morphologies and Viscoelastic Properties of Block Copolymers, J. C. Kelterborn and D. S. Soong, *Mid-August, p. 654*

277. *Transesterification*

The Transesterification of Bisphenol-A Polycarbonate (PC) and Polybutylene Terephthalate (PBTP): A New Route to Block Copolycondensates, *March, p. 229*

279. *Transparent Tough Materials*

Crosslinking of Fluorocarbon Elastomers: Characterization of Crosslinking System to Obtain Transparent, Tough Materials, G. A. Miller and L. H. Sperling, *Mid-June p. 478*

280. *Triblock Copolymer Blends-Mechanical Properties*

The Mechanical Properties of Styrene-Butadiene-Styrene (SBS) Triblock Copolymer Blends with Polystyrene (PS) and Styrene-Butadiene Copolymer (SBR), J. Diamant, D. Soong, and M. C. Williams, *Mid-August, p. 673*

281. *Triethoxy*

Mechanistic Studies of Adhesion Promotion by γ-Aminopropyl Triethoxy Silane in α-Al_2O_3/Polyethylene Joint, N. H. Sung, A. Kaul, I. Chin, and C. S. P. Sung, *July, p. 637*

V

284. *Velocity Gradient Fields*

Stress-Induced Diffusion and Chemical Reaction in Nonhomogeneous Velocity Gradient Fields, G. Akay, *September, p. 798*

286. *Vinyl-Acetate Content in EVA Copolymers*

Quantitative Determination of the Vinylacetate Content in Ethylene Vinyl Acetate Copolymers—A Critical Review, R. J. Koopmans, R. Van Der Linden, and E. F. Vansant, *Mid-October, p. 878*

288. *Viscoelastic*

Temperature Dependence of the Viscoelastic Shift Factor in Ionomers, L. A. Utracki, *Mid-February, p. 81*

Time-Dependent Morphologies and Viscoelastic Properties of Block Copolymers, J. C. Kelterborn and D. S. Soong, *Mid-August, p. 654*

290. *Vulcanizate Physical Properties*

The Relationship of Carbon Black Dispersion to Electrical Resistivity and Vulcanizate Physical Properties, R. J. Cembrola, *July, p. 601*

W

291. *Wall-Slipping Materials*

Thermodynamic Aspects in Extrusion of Wall-Slipping Materials, G. Mennig and N. Subramanian, *August, p. 747*

292. *Warpage*

An Analysis of Thermal Warpage in Injection Molded Flat Parts Due to Unbalanced Cooling, M. St. Jacques, *March, p. 241*

293. *Weathering*

The Weathering of Engineering Thermoplastics, J. D. Cooney, *Mid-June, p. 492*

294. *Weight Distribution*

A Note on the Prediction of Polyethylene Melt Rheological Properties From Molecular Weight Distribution Data Obtained by Gel Permeation Chromatography, B. H. Shah and R. Darby, *January, p. 53*

Molecular Weight Distribution of Polyethylene Terephthalate in Homogeneous, Continuous-Flow-Stirred Tank Reactors, A. Kumar, S. K. Gupta, and N. Somu, *Mid-April, p. 314*

X

295. *X-Ray Scattering*

Positional Small-Angle X-Ray Scattering, D. G. Legrand, G. R. Tryson, W. V. Olszewski, and C. M. Forth, *October, p. 928*
